Tutored Project: disintegration

Conception	3h	3h
Restructuration	1h30	3h (perte de temps)
ordina_number TU	20 mns	20 mns
Singleton Money	1h	1h
Replay Function	45 mns	45 mns
Doc HTML	25 mns	25 mns
Provost test	45 mns	45 mns
Filter	30 mns	30 mns
remove_token test	30 mns	30 mns

Tasks ... to do!

I did not do the CI because I thought it would take too much time, and it wasn't the most useful feature to add for a 2 days project.

I did not do the AI programming because of the lack of time

And I did not do all the UML diagrams because I knew I would have been more effective doing unit tests and adding features.

Task	Time spent	Estimated time	Problems to be solved
AI	4h	4h	
Le reste de l'UML	5h	5h
